

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	04 July 2026
Team ID	
Project Name	Personalised Networking Assistant
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming played an important role in the development of the **Personalized Networking Assistant** project. Our team discussed various ideas to solve challenges faced by people during networking events, seminars, and conferences. Every member contributed suggestions and possible solutions.

The ideas were evaluated based on user benefit, feasibility, and implementation effort. After prioritizing the most useful features, we selected an AI-powered assistant that analyzes event details, generates conversation topics, provides fact-checked information, and stores conversation history.

This process helped the team identify the best solution and develop a practical application using **Streamlit**, **FastAPI**, and **KeyBERT with DistilBERT** technologies.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & Idea Prioritization

Our team brainstormed different project ideas and evaluated them based on feasibility and user needs. After discussion, we selected the Personalized Networking Assistant project and finalized its core features.

🕒 10 minutes to prepare
👥 1 hours to collaborate are project-dependent
👤 2-8 people recommended

Before Collaboration
Before starting the project, our team gathered all members, defined the project goal, and discussed the problem to be solved. We also planned the workflow and assigned responsibilities to ensure effective collaboration throughout the project.

🕒 10 minutes

A Team Gathering
Our team of three members gathered to discuss the project and assigned responsibilities to each member.

B Set the Goal
We identified the problem and decided to develop the Personalized Networking Assistant to help users prepare for professional networking events.

C Planning
We planned the project workflow, selected the required technologies, and prepared for collaborative development.

1 Define the Problem Statement
Problem Statement (How Might We):

🕒 5 minutes

PROBLEM
How might we help users prepare for professional networking events by generating meaningful conversation topics and providing reliable information using AI?

Key Brainstorming Rules
To run a smooth and productive session

Stay focused on the problem.

Avoid judging ideas early.

Go for volume.

Encourage all ideas.

Listen to every team member.

Select the most practical solution.

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm

During the brainstorming session, each team member shared ideas to solve the identified problem.

10 minutes

TIP
You can select a sticky note and hit the pencil (option to sketch) icon to start drawing!

Team Member	Ideas Contributed	Project Selection (Summary)
Bhanu (Team Lead)	Develop an AI-based assistant to help users prepare for networking events.	
Raviteja	Generate personalized conversation topics based on event details and user interests.	
Mokshazna	Add fact-checking and conversation history features to improve reliability and user experience.	

After discussing all ideas, the team combined the best suggestions and finalized the Personalized Networking Assistant project.

3

Group Ideas

The team discussed all the proposed ideas and grouped similar concepts together. The ideas were organized into the following categories:

20 minutes

- **AI-Based Conversation Generation** – Personalized conversation topics for networking events.
- **User Assistance** – Event analysis based on user interests.
- **Reliability & History** – Fact-checking and conversation history storage.

TIP
Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mind.

After grouping the ideas, the team selected these core features for the Personalized Networking Assistant project.

Step-3: Idea Prioritization

3

Step 3

Idea Prioritization

The team evaluated all proposed ideas based on importance and feasibility. After discussion, the ideas were prioritized as follows:

Idea	Importance	Feasibility
AI-based conversation topic generation	High	High
Event analysis based on user interests	High	Medium
Fact-checking and conversation history	Medium	High

Based on this prioritization, the team decided to implement these features in the Personalized Networking Assistant project.
