

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	05 July 2026
Team ID	
Project Name	Personalised Networking Assistant
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Event Input	Enter event details and user interests. Validate user input.
FR-2	Conversation Topic Generation	Analyze event details. Generate personalized conversation topics using KeyBERT and DistilBERT.
FR-3	Fact Checking	Verify generated information using the Wikipedia API. Display fact-checked results to the user.
FR-4	Conversation History & Feedback	Save conversation history in a JSON file. Allow users to submit feedback on generated conversations.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The application should provide a simple, user-friendly interface that is easy to navigate.
NFR-2	Security	User input and stored conversation data should be handled securely.
NFR-3	Reliability	The system should consistently generate accurate conversation topics and reliable fact-checked information.
NFR-4	Performance	The application should process user requests and generate results with minimal response time.
NFR-5	Availability	The system should be available whenever users need to prepare for networking events.
NFR-6	Scalability	The application should support future enhancements, additional users, and new AI features without major changes.
